PROFESSIONAL SUMMARY

Motivated and detail-oriented **AI Applications** student at ITE College West with hands-on experience in machine learning pipelines, computer vision, natural language processing (NLP), and robotic process automation (RPA). Skilled in constructing full-stack AI project frameworks, web deployment, and automating workflow operations. Recognized leader (NYAA Silver Award recipient) with strong multilingual communication abilities and technical problem-solving skills.

TECHNICAL SKILLS

AI & Machine Learning	Computer Vision (CNNs), Natural Language Processing (Tokenization, Cosine Similarity, Sentiment Analysis), Predictive Modeling
Automation & Software	Robotic Process Automation (RPA), Base 44, UiPath Studio, Web Scraping
Programming & Web	Python, Pandas, HTML, CSS Frameworks, UI/UX Design (Adobe XD)
Tools & Infrastructure	GitHub, Google Colab, Jupyter Notebook, Microsoft Azure, Anaconda Prompt, VMware
Core Competencies	Data Validation, Task Prioritization, Technical Problem-Solving, Cross-Functional Collaboration

TECHNICAL PROJECTS

End-to-End AI Application Deployment Pipeline — Base 44, AI Project Development

- Managed complete project lifecycle covering requirements gathering, data validation, model pipeline construction, and hosting infrastructure.
- Integrated software execution pipelines to ensure stable application performance.

CNN Traffic Sign Classifier & NLP Sentiment Analysis Engine — Google Colab, Python

- Built a Convolutional Neural Network (CNN) to classify traffic road signage imagery for computer vision implementation.
- Engineered an NLP text similarity engine using tokenization and cosine similarity logic to compute semantic similarity indices.
- Designed and trained a sentiment analysis pipeline on review datasets to evaluate real-time text sentiment profiles.

RPA Bot Runner & Predictive Trend Forecasting — UiPath Studio, Excel, Python

- Independently engineered web-scraping scripts and automated bots to streamline log data tracking and administrative operations.
- Deployed predictive Machine Learning models on structured tabular data for accurate trend forecasting.

Responsive E-Commerce Portal & UX Design — HTML/CSS, Adobe XD

- Architected a multi-page, mobile-optimized web application emphasizing clean visual accessibility and user interface layout.

PROFESSIONAL EXPERIENCE

Operations & Data Logistics Associate — Oct 2024 – Dec 2024

Singapore Examinations and Assessment Board — Singapore

- Managed physical sorting, auditing, and secure packing of national O and A Level examination papers maintaining a zero-error record.
- Followed rigid security protocols and maintained confidentiality while categorizing sensitive medical certificates and non-standard submissions.

EDUCATION

Higher Nitec in AI Applications — Jan 2025 – Present (Exp. 2028)

Institute of Technical Education College West, Singapore

- **Relevant Coursework:** Python Programming, NLP, Computer Vision, RPA, Software Development, Cybersecurity Fundamentals, Data Analytics.

GCE N-Levels / Secondary Education — 2021 – 2024

Woodlands Secondary School, Singapore

AWARDS & LEADERSHIP

- **National Youth Achievement Award (NYAA) – Silver:** Recognized for sustained community service, physical endurance, and skill acquisition.
- **Woodlander of the Term Award:** Awarded for exemplary leadership, character, and initiative in student activities.

LANGUAGES

- **English:** Native / Professional | **Chinese (Mandarin):** Native / Professional | **Cantonese:** Native / Professional | **Malay:** Basic / Conversational | **Indonesian:** Basic / Conversational
